

Professor Vishnu Vasudeva Narlikar Memorial Lecture (2018)

An INSA Award Lecture

Held jointly under the auspices of
Indian National Academy of Sciences (New Delhi), Indian Academy of Sciences
(Bengaluru) and Indian Institute of Science (Bengaluru)

Mathematical analysts seem to have an obsession with inequalities and they search for them even within equalities! Then they ask for conditions under which equality holds. They even go to the extent of quantifying the inequalities and ask for sharp constants. Strange it may seem, we demonstrate that this is the case, with several examples.

Moderated by: **Renee M. Borges**,
Convenor, INSA Bangalore Chapter

IN SEARCH OF INEQUALITIES

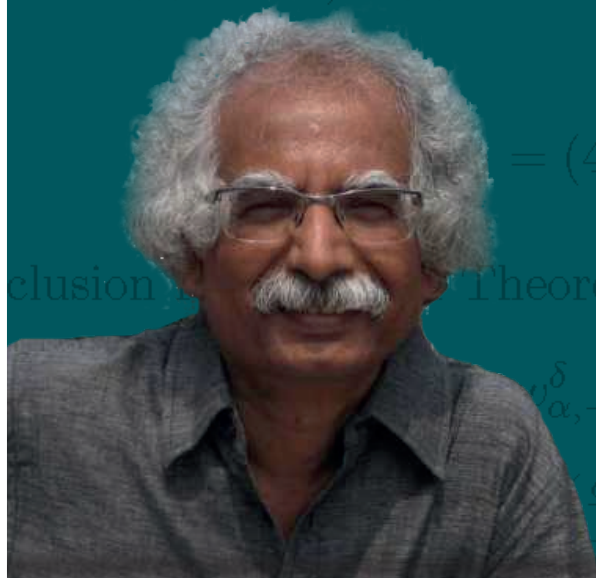

4.30–5.30 pm

Friday, 15 February 2019

LH 1, Department of Mathematics

Indian Institute of Science, Bengaluru

SPEAKER

Professor S. Thangavelu
Department of Mathematics,
Indian Institute of Science, Bengaluru

Refreshments will be served after the talk on the terrace.
